**The IRP Catalog**

The IRP catalog is updated frequently and printed in small quantities. It is meant to serve as a reference and source of information as well as a listing of parts and prices. Your suggestions on how to improve both the catalog and the company are most welcome!

As with most catalogs, sometimes we have price changes that are not reflected in the catalog. We try to quote the price by telephone to ensure that you have a clear understanding of each item. If you have any questions, please ask! Part of our service is to provide knowledgeable assistance in support of your racing.

If you do not see exactly what you are looking for, or if you have questions, please call. We don't list every item in the catalog, and we continually expand our inventory. If we don't have it, we can usually get it or recommend a reputable source.

IRP has recently added a web site, and development will continue, including listings of formula cars for sale, new additions to the IRP inventory and a variety of technical information. Visit our site at [WWW.FORMULACARS.COM](http://WWW.FORMULACARS.COM).
