Section 3 Support Equipment

Formula cars require some special equipment to optimize their operation. IRP has studied various sources, and has specified unique requirements to our manufacturers to ensure that we provide superb equipment at competitive prices.

Intercomp pyrometer. Digital readout with probe. Rugged, with large readout, yet small and light enough to fit in your pocket. This is as basic a tool for the racer as a 9/16" wrench! Part #55-00-77, \$158.00.

Intercomp tire pressure gauge reads from 0-30 psi on a 2 1/4" round dial indicator protected by a rubber ring. Has a pressure relief button, too. Part 55-00-78, \$28.00.

IRP folding chassis stands fit easily in your trailer, and open just as easily to hold your car. These are approximately 9" high, and designed to work with the IRP chassis stand. \$130.

Here Courtney, IRP's Vice-President of Mirth and Joy hoists Larry, who weighs about the same as a formula car front end. The IRP quick-jack uses an extra-long, removable handle which will allow most people to lift an entire formula car with one pull. The jack has wheels and a low clearance of about 1 1/2". \$239.

IRP Quick-Jack
